YOUR HOME, YOUR LIFE

# T E C N I C H E

## UN COLORE NON È MAI UGUALE A SE STESSO

Le porte Dierre possono anche essere personalizzate (a seconda del modello) con i colori RAL e/o NCS.

La cartella colori RAL è una scala normalizzata molto utilizzata in ambito produttivo, soprattutto nel settore delle finiture e delle vernici. È stata creata nel 1925 dal Reichsausschuss für Lieferbedingungen e i codici RAL sono composti da 4 cifre, raggruppati per migliaia in base alla famiglia di colori.

NCS (Natural Colour System®) è un sistema logico di ordinamento dei colori che si basa sul modo in cui questi sono percepiti ed è riconosciuto in campo internazionale come il linguaggio universale dei colori perché aiuta i professionisti del colore in tutto il mondo, con un linguaggio univoco che non lascia spazio a errori di comunicazione. Per mezzo del Sistema cromatico NCS, infatti, ogni possibile colore di superficie può essere descritto ed identificato con uno speciale codice (Notazione NCS).

Il Sistema NCS si fonda sui sei colori elementari e non associabili a livello percettivo ad alcun altro colore: bianco (W), nero (S), giallo (Y), rosso (R), blu (B) e verde (G). Le notazioni dei colori NCS si basano sulla somiglianza con questi sei colori elementari.

Il sistema RAL cataloga un insieme arbitrario e ristretto di sfumature ben definite e standardizzate, quello NCS invece fornisce un codice in grado di identificare univocamente i 10 milioni di tinte che l'occhio umano è in grado di percepire.

## A COLOUR NEVER FULLY RESEMBLES ITSELF.

*The Dierre doors can also be customized (depending on the model) with RAL and NCS colours.*

*The RAL colour card is a normalized scale very used in manufacturing, especially in the field of finishes and paints. It was created in 1925 by Reichsausschuss für Lieferbedingungen and the RAL codes are composed of 4 digits, grouped by thousands based on the colour group.*

*NCS (Natural Color System®) is a logical colour ordering system based on the way these are perceived and is internationally recognized as the universal language of colours as it helps colour professionals worldwide use a unique language that leaves no room for communication errors. In fact, by means of the NCS chromatic system every possible surface colour can be described and identified through a special code (NCS notation). The NCS System is based on the six elementary colours and cannot be associated to the perceptive level to any other colour: white (W), black (S), yellow (Y), red (R), blue (B) and green (G). The NCS colour notations are based on the similarity with these six elementary colours.*

*The RAL system orders an arbitrary and narrow set of well-defined and standardised shades, the NCS instead provides a code able to univocally identify the 10 million colours that the human eye is able to perceive.*

Le informazioni presenti in questo catalogo possono subire variazioni.

I materiali rappresentati sono puramente indicativi: per la verifica dei colori si rimanda al campionario.

*The information contained in this catalogue may undergo variations.*

*The materials shown are a bare example: for the verification of colours please refer to the sample collection.*

# T E C N I C H E

Le porte Alutech e Fusion della collezione tecniche di Dierre si contraddistinguono per il telaio in alluminio abbinabile a differenti finiture dell'anta. Confortevoli e antinfortunistiche con gli spigoli arrotondati, igieniche con superfici concepite per tenere lontano sporco e batteri. Ospedali, rsa, uffici, esercizi commerciali, scuole e aeroporti: queste porte sono state progettate per rispondere alle specifiche esigenze di edifici pubblici e ambienti professionali. Molteplici le combinazioni di tipologia d'apertura. La serie si completa con Shape, l'innovativo e funzionale sistema di pannelli chiudi vano a filomuro.

*The Alutech and Fusion doors of Dierre's technical collection stand out for their aluminium frame that can be combined with different door finishes. Comfortable and accident-preventing with rounded edges, hygienic with surfaces designed to keep out dirt and bacteria. Hospitals, nursing homes, offices, shops, schools and airports: these doors are designed to meet the specific needs of public buildings and professional environments. Many opening type combinations available. The series is completed by Shape, the innovative and functional flush-to-wall panel system.*

# ARMADIO SHAPE

# ARMADIO SHAPE

Un sistema evoluto di pannelli filomuro a una o due ante, con apertura fino a 180° per zone d'ispezione, che si mimetizzano perfettamente con la parete, consentendo di realizzare ripostigli o nascondere quadri di controllo.

Shape è realizzata con un telaio in estruso di alluminio anodizzato spazzolato verniciabile, presenta un profilo a murare completamente a raso ed è disponibile con pannelli in essenza, laccati o grezzi, per verniciatura o carta da parati.

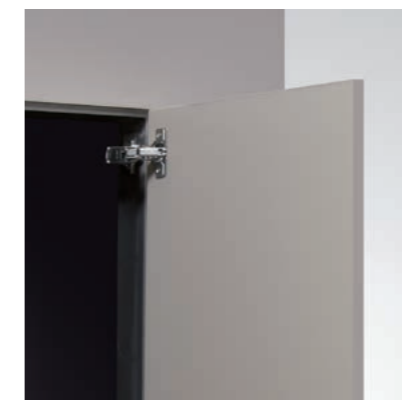

*An advanced system of flush-fitting panels with one or two leaves, opening up to 180° for inspection areas, which blend in perfectly with the wall, making it possible to create storage space or hide control panels.*

*Shape is made with a paintable brushed anodised extruded aluminium frame, has a completely flush wall profile and is available with panels in wood, lacquered or unfinished, for painting or wallpapering.*

Dettaglio della cerniera e del profilo telaio a murare completamente a raso parete
